SUMMARY

Motivated 2nd-year B.E. CSE (AI & ML) student at Gharda Institute of Technology, Lavel, with hands-on experience building AI-powered web applications and ML dashboards. Passionate about end-to-end solution development spanning Machine Learning, Full-Stack Web Development, and DevOps. Actively seeking internship opportunities to apply technical skills and contribute to impactful real-world projects.

EDUCATION

B.E. Computer Science & Engineering (AI & ML) Gharda Institute of Technology, Lavel (Mumbai University)	2024 – Present
Higher Secondary Certificate (HSC – Science) Maharashtra State Board	2023 – 2024
Secondary School Certificate (SSC) Maharashtra State Board	2021 – 2022

PROJECTS

Silent Dropout Predictor — AI-Powered Analytics Dashboard <i>Python · Streamlit · Scikit-Learn · SHAP · Google Gemini API · Twilio · Plotly · Pandas</i> - Designed and built an ML-powered dashboard to predict student dropout risk using a trained Random Forest Classifier. - Integrated SHAP (Explainable AI) visualisations so educators can understand exactly why each student was flagged. - Automated personalised email drafting via Google Gemini AI and real-time SMS alerts to parents using the Twilio API. - Deployed live on Streamlit Cloud — student-analytics-dashboard.streamlit.app	2025 – 2026
Frappe Culture Menu — Framework Practice Project <i>TypeScript · Frappe Framework · Python</i> - Enterprise web app with DocType design, server-side scripting & custom UI. Live: frappe-culture.lovable.app - Practised enterprise-grade development within a real-world Frappe environment.	2025
Rumasa Culture — Cultural Fashion Website <i>HTML · CSS · Web Design</i> - Cultural fashion & clothing website showcasing traditional outfits like lehengas and gowns. - Clean, visually rich front-end built with pure HTML & CSS. Live: rumasa-culture.netlify.app	2025 – 2026
AI Bilingual Flood Risk Microservice <i>Python · REST API · WebSocket/SSE · AI/ML</i> - CODEBITS 4.0 Hackathon (PS08) — real-time flood risk scoring system for Indian cities. - Ingests rainfall, tide, elevation & drainage data; exposes secure REST APIs with bilingual (English–Marathi) dashboard.	2026

CERTIFICATIONS

Full Stack Java Introductory Course SEED Infotech Ltd. in association with Gharda Institute of Technology	Jul – Aug 2025
Database Management System (DBMS) SEED Infotech Ltd. in association with Gharda Institute of Technology	Jan – Feb 2026
Prompt Engineering LearnTube.ai · ID: add4cb4d-5343-4413-8b62-6c75de7d4cf5	2025

ACHIEVEMENTS & HACKATHONS

CODEBITS 4.0 Hackathon — Certificate of Participation

Mar 2026

Dept. of Computer Engineering & AITML, Gharda Institute of Technology, Lavel · 11–12 March 2026

- **Problem Statement PS08:** AI-Driven Bilingual Urban Flood Risk Microservice.
- Built a configurable microservice to ingest rainfall, tide/river level, elevation, drainage capacity, and historical flooding data to compute real-time flood risk scores per city grid.
- Developed secure REST APIs and WebSocket/SSE streams with basic offline tolerance (data buffering when upstream sources are unavailable).
- Implemented a bilingual (English–Marathi) dashboard for operators to visualise risk heatmaps and adjust model parameters.
- Recognised for exemplary problem-solving skills and dedication towards innovation across a 2-day hackathon.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3, Java (Basics)
AI / ML: Scikit-Learn, Random Forest, SHAP (XAI), NumPy, Pandas, Matplotlib, OpenCV
Web & Backend: Flask, FastAPI, Streamlit, Frappe Framework
Databases: MySQL, Supabase, Firebase
DevOps & Cloud: Git, GitHub, Docker (Learning), Vercel, Netlify
APIs & Tools: Google Gemini API, Twilio, Figma, Canva

LANGUAGES

English	Hindi	Marathi
Professional Proficiency	Native / Full Proficiency	Native / Full Proficiency

PERSONAL DETAILS

Nationality: Indian	Date of Birth: 28 January 2007
